Work History

2017-12 -
2021-11

Software Quality Assurance Engineer

BSD Education, Bangkok, Thailand

- BSD Education is an online learning platform. BSD Education builds up design, develop and deliver program of learning of digital skills, making it easier for teachers to integrate technology curriculum, including coding, into their existing lessons and teaching across all subjects. This is Hong Kong based company however there has other branches which are located in the USA, Thailand, Philippines.
- I'm working with development team collaboratively and focusing to test release core features and bugs fixing by managing release process on time. And also, my main responsibility is investigation and replicating issues from end-user and raise issues on Github. As well as, I give for workaround for some issues. If it needs urgent fix, I suggest to deploy hot-fix. I make prioritised and organized bugs and also tracking for fixing process for weekly releases.
- I lead the support team and write and maintain well-organized for efficient manual test cases by using Qase.io and google sheet. For automated test scripts, I used Selenium, Nighthatch.js in past. Now, I am currently writing test scripts and running on Cypress.io.

 Excellent

- I was making reports for SEO needs and optimized strategies for short and long-term campaigns. I researched social trends to increase customer engagement through social media.
- I followed client guidelines, rules and regulations when I was creating a content by using relevant keywords to improved page. And also produced social analytical reports for monthly, quarterly and yearly.
- I worked there for one year only. Then, I was finding a software QA job in bangkok.

2012-07 -
2014-07

Software Developer

INnoWave IT Solution, Yangon, Myanmar

- INnoWave IT Solution is an IT start up company in Yangon, Myanmar. I joined this company after I graduated. I developed Inventory Control Management System Software for use in wholesale distribution of electrical apparatus and equipment in Myanmar. I built up this platform by using object-oriented methodology with C#, LINQ and Microsoft SQL Server. I led the team by assigning tasks to colleagues. I tested, deployed scalable, high quality product to deliever to the clients.
- And also, I built up some websites by using CMS (wordpress), JQuery, CSS and xampp server. I took part in bugs fixing and developing new features for travel and tour web application which was developed by PHP, mysql, Javascript, JQuery, CSS, HTML.
- Worked closely with clients to establish problem specifications and system designs.
